

2022 - 2023 COVID Protocols

Masks

The decision to mask is a personal one, that includes in the classroom, unless there is a bigger mandate in place, i.e., a statewide mandate.

Close Contact Tracing

In accordance with the CDC guidelines, the school nurse will not routinely conduct contact tracing.

Quarantine

If the school has been notified of a positive Covid case, the school nurse will recommend the latest CDC and ADPH guidelines which currently include a five-day quarantine from the onset of symptoms after receiving a positive test result. Persons who have tested positive and are returning to campus after a 5 day quarantine, will be strongly encouraged to wear a mask for 5 days, in accordance with CDC/ADPH guidelines.
